

THE SOLO FOUNDER SERIES

Build Your AI Chief of Staff

Turn any AI assistant into a chief of staff that runs your day, protects your focus, and never forgets your context.

Why a chief of staff, not a chatbot

Most people use AI like a vending machine: ask, answer, forget. A chief of staff holds your goals, sets your plan, remembers every decision, and keeps you moving when you stall. Build one in an afternoon, no code.

THE SHIFT

You stop managing the AI. The AI starts managing the work — and surfaces only what needs your decision.

The 4 pillars

1. CONTEXT THAT FOLLOWS YOU

One living document your AI reads at the start of every session: North Star, active projects, decisions made, and a running log of what just happened.

- ☐ Write your North Star (the one outcome that matters)
- ☐ List active projects + their current goal
- ☐ Record decisions as you make them
- ☐ End each session by logging what changed

2. A ROLE CONTRACT

Tell your AI who it is to you and give it standing orders: drive the plan, protect commitments, reduce decisions not effort, treat unshipped work as not done.

COPY-PASTE PROMPT

“You are my chief of staff. Each morning set my top 1-3 tasks toward [GOAL]. When I bring new ideas, capture them and offer a trade against what's committed. Keep replies short and action-first.”

3. DELEGATION TO SUB-AGENTS

Treat each project like it has its own manager. Your chief of staff sets each manager's tasks; the managers do the work. Even solo, this keeps work organized by area.

4. A DAILY CADENCE

- ☐ Morning: review goals + carryover, set today's 1-3 moves
- ☐ Midday: quick re-check
- ☐ Evening: what shipped, what slipped, what carries over

Your afternoon build checklist

- ☐ Create your context document
- ☐ Paste the role-contract prompt
- ☐ Name your projects + managers
- ☐ Run your first morning brief
- ☐ Log one decision and one win

REMEMBER

The goal isn't a smarter chatbot. It's never having to guess what to work on again.

GO DEEPER

Want this done for you?

This guide hands you the system. If you'd rather have it built for you, that's what I do: I find where your time leaks and build the tool that plugs it. No hype — just your hours, back.
