

THE SOLO FOUNDER SERIES

The Context Nucleus

One living document that becomes your second brain — so every AI tool you touch already knows your whole world.

The problem with AI memory

Every new chat starts from zero. You re-explain your business, your goals, your decisions — again. The Nucleus fixes this: one file every tool reads first.

The structure

NORTH STAR

The one outcome that matters. Changes rarely. It's the filter for everything.

ACTIVE THREADS

The 1-5 things in flight right now. A fresh session reads this and is instantly caught up.

DECISIONS & CONVENTIONS

Choices already made, so nothing gets re-litigated. 'We use X, not Y.' 'Always do Z.'

HANDOFFS (THE LOG)

Newest-first, timestamped notes of what just happened. The message-in-a-bottle between sessions.

THE RULE

Capture the signal, not the chatter. One crisp line per item. Dedupe. Keep it dense and high-signal.

How to run it

- ☐ Open every session: have your AI read the Nucleus
- ☐ Capture decisions, preferences, and wins as they happen
- ☐ Close every session: log what changed
- ☐ Weekly: prune duplicates, promote patterns into the top sections

WHY IT WORKS

Context compounds. By week two your AI briefs you before you ask.

GO DEEPER

Want this done for you?

This guide hands you the system. If you'd rather have it built for you, that's what I do: I find where your time leaks and build the tool that plugs it. No hype — just your hours, back.
