

CONTENT & POSTING

Beat the Posting Block

You can make the content. You freeze on publish. Here's the system that gets it live anyway.

The block is insecurity, not ability

You can create all day. Hitting 'post' is where it stops — because posting feels like exposure. Name that, and you can engineer around it.

Pre-decide everything

Never face a blank decision at publish time. Decide what + where in advance, so all that's left is one physical action.

- ☐ Pick the platform before you create
- ☐ Write the caption in advance
- ☐ Shrink it to one action: 'paste this, hit publish'

Shrink the action

THE TRICK

The win isn't the recording — it's the posting. Separate them. Create now, post in a tiny scheduled moment with someone (or something) waiting with you.

Redefine done

Drafted is not done. A post that never goes live did nothing. Treat published as the only finish line, and celebrate it.

- ☐ Drafted ≠ done
- ☐ Published = done
- ☐ Name the win out loud when it's live

GO DEEPER

Want this done for you?

This guide hands you the system. If you'd rather have it built for you, that's what I do: I find where your time leaks and build the tool that plugs it. No hype — just your hours, back.

LET'S TALK
