

CONTENT & POSTING

Cross-Post One Video Everywhere

The exact workflow to take one clip live on Facebook, Instagram, LinkedIn, X, and TikTok — fast.

The setup

One video, five platforms, minimal friction. The trick is a shared file source + per-platform captions ready in advance.

Host the file once

- ☐ Upload your video to cloud storage
- ☐ Set sharing to 'anyone with the link'
- ☐ Grab the direct file link

Caption per platform

Each platform wants a different shape: punchy + hashtags for IG/TikTok, value-framed for LinkedIn, short for X, warm + conversational for Facebook.

REACH NOTE

Native uploads usually beat third-party for short video — especially on TikTok. When reach matters, post natively.

The platform reality

- ☐ Facebook personal profiles: manual only (no tool can post them)
- ☐ Pages, IG Business, LinkedIn, TikTok: schedulable
- ☐ Lead on your most responsive platform first

GO DEEPER

Want this done for you?

This guide hands you the system. If you'd rather have it built for you, that's what I do: I find where your time leaks and build the tool that plugs it. No hype — just your hours, back.
