

CONTENT & POSTING

Cross-Post One Video Everywhere

The exact workflow to take one clip live on Facebook, Instagram, LinkedIn, X, and TikTok - fast.

One clip, five platforms, minimal friction.

- 1 Host the file once in cloud storage; set it to 'anyone with the link'.
- 2 Write a caption shaped for each platform in advance.
- 3 Post natively where reach matters most (especially TikTok).
- 4 Know the rules: personal Facebook profiles can't be auto-posted.
- 5 Lead on your most responsive platform first.

That's the whole system. The rest of this guide walks each step, with copy-paste prompts you can run in one tap.

The deep walkthrough

1

Prep the asset

One source file, ready to reuse everywhere.

PROMPT · PREP MY CLIP

I have a [length] video about [topic]. Give me a quick pre-post checklist: aspect ratio per platform, caption length limits, hashtag norms, and where native upload beats scheduling for reach.

tap to auto-fill

2

Caption for each platform

Different platform, different shape - same message.

PROMPT · FIVE CAPTIONS

Write captions for this video on Facebook, Instagram, TikTok, LinkedIn, and X: [DESCRIBE VIDEO]. Match each platform's tone, open with a hook, end with the same question. Keep IG/TikTok punchy with 5 hashtags; LinkedIn value-framed; X short.

tap to auto-fill

3

Sequence the posts

Order matters - start where your people respond.

PROMPT · POSTING ORDER

Given my most responsive platforms are [LIST in order], tell me the order to post this clip and roughly when, to maximize engagement and cross-pollination. Keep it to a simple schedule.

▶ Run in ChatGPT

▶ Run in Claude

tap to auto-fill

REACH NOTE

Native uploads usually beat third-party for short video. When reach matters, post natively.

GO DEEPER

Want this done for you?

This guide hands you the system. If you'd rather have it built for you, that's what I do: I find where your time leaks and build the tool that plugs it. No hype — just your hours, back.
