

PRACTICAL AI

Your First Company GPT

Set up an AI assistant that actually knows your business - your offers, voice, and FAQs. With the exact setup prompts.

A generic AI gives generic answers. Feed it your business and it becomes yours.

- 1 Gather: offers + pricing, brand voice, top FAQs, ideal customer, your 'never do' list.
- 2 Give it a clear job and guardrails.
- 3 Put it to work: replies, lead qualifying, onboarding, briefing you.
- 4 Keep it fresh whenever an offer or price changes.
- 5 It's only as good as its last update.

That's the whole system. The rest of this guide walks each step, with copy-paste prompts you can run in one tap.

The deep walkthrough

1

Gather the knowledge

The AI is only as good as what you feed it.

PROMPT · GATHER MY KNOWLEDGE

Interview me to build the knowledge base for a company AI: my offers + pricing, my brand voice (with 5 example phrases), my top 20 FAQs + answers, my ideal customer and their pain, and what I never want it to say or do. Output it as a clean reference doc.

▶ Run in ChatGPT

tap to auto-fill

2

Give it its job

Clear instructions + guardrails.

PROMPT · THE COMPANY GPT INSTRUCTIONS

Write the system instructions for my company assistant: 'You represent [BUSINESS]. Answer only from the facts in this knowledge base, in our voice. If you don't know, say so and offer to connect them to a human. Never [DO X].' Then list 4 jobs it should handle well.

▶ Run in ChatGPT

▶ Run in Claude

tap to auto-fill

3

Put it to work

Real tasks, in your voice.

PROMPT · DRAFT A CUSTOMER REPLY

Using my company knowledge base, draft a reply to this customer message in our brand voice: [PASTE MESSAGE]. Keep it helpful and on-brand; flag anything you're unsure about for me to confirm.

▶ Run in ChatGPT

▶ Run in Claude

tap to auto-fill

KEEP IT FRESH

Update it whenever an offer, price, or FAQ changes. A company GPT is only as good as its last update.

GO DEEPER

Want this done for you?

This guide hands you the system. If you'd rather have it built for you, that's what I do: I find where your time leaks and build the tool that plugs it. No hype — just your hours, back.
