

THE SOLO FOUNDER SERIES

Build Your AI Chief of Staff

Turn any AI assistant into a chief of staff that runs your day, protects your focus, and never forgets your context. With copy-paste prompts you run in one tap.

Turn any AI into a chief of staff that runs your day - in 5 moves.

- 1 Create ONE Context Doc your AI reads first: goals, projects, decisions, a running log.
- 2 Paste the Role Contract so it DRIVES - sets your day and protects your commitments.
- 3 Give each project a manager. The AI delegates and drafts; you approve.
- 4 Run a 60-second Morning Brief: today's 1-3 that matter + the single first action.
- 5 Close each day in 60 seconds: what shipped, what slipped, one win. Repeat.

That's the whole system. The rest of this guide walks each step, with copy-paste prompts you can run in one tap.

The deep walkthrough

Five steps. Each has a copy-paste prompt - tap 'Run in ChatGPT' or 'Run in Claude' and it auto-fills. Do them in order once; after that it runs on rails.

1

Build your Context Doc

This is your AI's memory - one document it reads at the start of every session so you never re-explain yourself. Use the prompt below; answer its questions, and it writes the doc for you. Paste the result somewhere you can reuse it.

PROMPT · GENERATE YOUR CONTEXT DOC

Help me build a Context Doc my AI will read at the start of every session. Interview me ONE question at a time to capture: (1) my North Star - the single outcome that matters most right now; (2) my active projects and each one's current goal; (3) decisions and preferences I've already made; (4) anything you should never do. When finished, output it as a clean, dated document I can paste into any chat.

tap to auto-fill

2

Install the Role Contract

This is what makes the AI a chief of staff instead of a chatbot. Paste it at the start of a session (or save it as a custom instruction). It tells the AI to drive, protect your commitments, and keep you moving.

PROMPT · THE ROLE CONTRACT (PASTE AT SESSION START)

You are my chief of staff and execution partner. Standing rules: (1) DRIVE - at the start of each session propose my top 1-3 tasks toward [MY GOAL]; don't wait to be asked. (2) PROTECT COMMITMENTS - when I bring a new idea, capture it and offer a trade against what's already committed; never just say yes. (3) REDUCE DECISIONS, not effort - give me ONE clear next move, not six options. (4) Treat drafted-but-unshipped work as NOT done. (5) Keep replies short and action-first. Confirm you understand, then ask me for my Context Doc.

▶ Run in ChatGPT

▶ Run in Claude

tap to auto-fill

3

Set up your managers

Don't pile every task into one chat. Give each project its own 'manager' with a clear remit, so work stays organized by area. Run this once per project.

PROMPT · SPIN UP A PROJECT MANAGER

Act as the manager for my project [PROJECT NAME]. Your remit in one sentence: [WHAT THIS PROJECT NEEDS]. My brand/voice: [DESCRIBE]. When I give you a task, deliver [FORMAT], then STOP for my approval before anything ships. Start by listing the 3 things you'd work on first and why.

▶ Run in ChatGPT

▶ Run in Claude

tap to auto-fill

4

Run the Morning Brief

Open your day with this. The AI reads your Context Doc and hands you a one-screen plan - not a wall of tasks. Lead with the single first action so there's no decision to freeze on.

PROMPT · YOUR 60-SECOND MORNING BRIEF

It's the start of my day. Read my Context Doc. Give me a 60-second morning brief: (1) what carried over from yesterday; (2) today's 1-3 tasks that most move [MY GOAL]; (3) the SINGLE first action to take right now. One screen. Lead with the action.

▶ Run in ChatGPT

▶ Run in Claude

tap to auto-fill

5

Run the Evening Close

Close the loop so tomorrow starts warm. This captures what happened and writes it into your Context Doc's log - the memory that makes your AI smarter every day.

PROMPT · YOUR 60-SECOND EVENING CLOSE

It's the end of my day. Ask me: what shipped, what slipped (and why), what carries to tomorrow, and one win. Then write a one-line, dated handoff into my Context Doc's log, and tell me tomorrow's likely first move.

▶ Run in ChatGPT

▶ Run in Claude

tap to auto-fill

Bonus prompt pack

Keep these handy. They're the moves you'll reach for again and again.

PROMPT · UNSTICK ME (FOR AVOIDANCE)

I'm avoiding [TASK]. Don't motivate me - shrink it. Give me the smallest possible first physical action (under 2 minutes) that starts it, then wait while I do it.

▶ Run in ChatGPT

▶ Run in Claude

tap to auto-fill

PROMPT · WEEKLY REVIEW

Run my weekly review. From my Context Doc and what I tell you: what moved toward [MY GOAL], what stalled, what to cut, and my 3 priorities for next week. End with one honest observation about where I'm avoiding.

▶ Run in ChatGPT

▶ Run in Claude

tap to auto-fill

PROMPT · LOG A DECISION

Log this decision in my Context Doc: [DECISION]. Capture the choice, the reason, and the date in one crisp line so we never re-litigate it.

▶ Run in ChatGPT

▶ Run in Claude

tap to auto-fill

THE PAYOFF

Run this for one week. Open every session with the Role Contract + Context Doc; close every session with the Evening Close. By day seven your AI briefs you before you ask. That's a chief of staff - and you built it in an afternoon.

GO DEEPER

Want this done for you?

This guide hands you the system. If you'd rather have it built for you, that's what I do: I find where your time leaks and build the tool that plugs it. No hype — just your hours, back.
